

Typography - Copywriting Font

Copy Font 1

Open sans is our 6D Communication & copy font.
(Meaning all Purpose Font)
We selected this for its legibility across print, web, and mobile interfaces. It is excellent for any type of use. It's incredibly readable in small sizes and also works great when printed in huge letters.

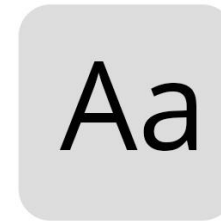

Copy Font 2

We are using Poppins as Copy font 02.
It is one of the Geometric sans serif Typefaces. It has beautiful curves and well rounded corners, which is suitable for both traditional, as well as modern websites

Celebration font

We have Kalam as our Celebration Font.
As it is derived from handwriting, we use it for few celebrating occasions like festivals and funtime communications.

Copy Font 1

Open Sans

Light, Regular, **Semi Bold**, **Bold**

Typography - Tracking & Leading

Tracking

Tracking refers to uniformly increasing or decreasing the horizontal spacing between a range of characters. **We have Standardised the tracking point as 0px.**

Tracking

This Text follows Right Tracking

This Text follows wrong Tracking

Leading

Leading is the vertical space between two lines of text. **We have to choose leading as next Multiple of 10.**

Leading in
Lines

Example:

for Font size 12px - leading should be 20px

for Font size 24px - leading should be 30px

for Font size 32px - leading should be 40px

This Text follows
Right Leading

This Text follows
Wrong Leading

Typography - Styling Technique

There are various methods by which we can improvise The **Readability & Legibility** of the text.

Readability means how easy it is to read words, phrases & blocks. & Legibility means information which is noticeable and distinguishable.

There are few Factors which helps us to enhance these.

Size is the easiest method to represent visual hierarchy.

Weight is simply adjusting the different fonts thickness.

Color plays a big role in typography. Use brand primary shades to make words pop out in a context.

By combining simply two **contrasting** fonts we can achieve that.

Font Size

Typographic hierarchy shows the reader which information to focus on which is most important and which is simply supporting the main points. There are a variety of things that make up typographic hierarchy on the web.

Font Color

Typographic hierarchy shows the reader which **information to focus** on which is most important and which is simply supporting the main points. There are a variety of things that make up typographic hierarchy on the web.

Font Weight

Typographic hierarchy shows the reader which **information to focus** on which is most important and which is simply supporting the main points. There are a variety of things that make up typographic hierarchy on the web.

Font Contrast

Typographic hierarchy shows the reader which information to focus on which is most important and which is simply supporting the main points. There are a variety of things that make up typographic hierarchy on the web.

Typography - Styling Technique

When sections of information are **positioned** with respect to each other they establish a hierarchy.

1. Pay Special attention to the structure of your text blocks to optimize the legibility and Quick comprehension.
2. Whenever Possible Break the content into easy & digestible blocks of information.
3. Avoid full-justy in paragraphs

Typography - Hierarchy

We standardised our Typographic Hierarchy to be used across all communication copy
To achieve this we have combined font weights & Font- sizes to Create a Typographical Hierarchy.

1. **Title**

Font Weight - **Light** and Font Size - **36px**

Title - Light 36px

2. **Heading**

Font weight - **Bold** and Font size - **15px**

Heading - Bold 15px

3. **Subheading**

Font weight - **Semibold** and Font size - **12 or 14px**

Sub Heading - Semibold 12 or 14px

4. **Paragraph 01**

Font weight - **Normal** and Font size - **12px**

Paragraph 01 - Normal 12px

5. **Paragraph 02**

Font weight - **Normal** and Font size - **11px**

Paragraph 02 - Normal 11px

6. **Note**

Font weight - **Semibold** and Font size - **11px**

Note - Semibold 11px
